Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE

WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

ICPSR PROCESSING NOTES FOR #37143

Impact of the NYC Sugar Sweetened Beverage Policy on Calories Purchased and Consumed: Data on Fast Food Purchases, Dietary Patterns, and Retail Beverage Environments in New York City, Newark, and Jersey City, 2013-2014
DS 5: Dietary Recall Data

1. **Variable Link:** Data from the point-of-purchase survey dataset (DS1), point-of-purchase receipt dataset (DS2), and the dietary recall dataset (DS5) can be merged utilizing the receipt identifier variable, **RECEIPTID**. The data can also be merged with the environmental scan datasets (DS3 and DS4) by utilizing the NEMS location variable, **NEMSLOCATIONINDICATOR**. The point-of-purchase and dietary recall datasets need to be merged first before merging them to store environmental scans as those datasets do not have the NEMS location variable needed to merge to store-level datasets.

ICPSR 37143

Impact of the NYC Sugar Sweetened Beverage Policy on Calories Purchased and Consumed: Data on Fast Food Purchases, Dietary Patterns, and Retail Beverage Environments in New York City, Newark, and Jersey City, 2013- 2014

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, arithmetic mean, median, mode, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
