ICPSR PROCESSING NOTES FOR #37143

Impact of the NYC Sugar Sweetened Beverage Policy on Calories Purchased and Consumed: Data on Fast Food Purchases, Dietary Patterns, and Retail Beverage Environments in New York City, Newark, and Jersey City, 2013-2014
DS 2: Point-of-Purchase Receipt Data

1. **Variable Link:** Data from the point-of-purchase survey dataset (DS1), point-of-purchase receipt dataset (DS2), and the dietary recall dataset (DS5) can be merged utilizing the receipt identifier variable, **RECEIPTID**. The data can also be merged with the environmental scan datasets (DS3 and DS4) by utilizing the NEMS location variable, **NEMSLOCATIONINDICATOR**. The point-of-purchase and dietary recall datasets need to be merged first before merging them to store environmental scans as those datasets do not have the NEMS location variable needed to merge to store-level datasets.

ICPSR 37143

Impact of the NYC Sugar Sweetened Beverage Policy on Calories Purchased and Consumed: Data on Fast Food Purchases, Dietary Patterns, and Retail Beverage Environments in New York City, Newark, and Jersey City, 2013-2014

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, arithmetic mean, median, mode, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

Point-of-Purchase Receipt Data

RECEIPTID: Unique identifier

Based upon 29,099 valid cases out of 29,099 total cases.

Location: 1-10 (width: 10; decimal: 0)
Variable Type: character

PROBLEMRECEIPT: Problem receipt?

Value	Label	Unweighted Frequency	%
-	-	9663	33.2 %
MISSING	-	7	0.0 %
No	-	19199	66.0 %
Yes	-	230	0.8 %
	Total	**29,099**	**100%**

Based upon 29,099 valid cases out of 29,099 total cases.

Location: 11-17 (width: 7; decimal: 0)
Variable Type: character
